Eric -- My astute colleague Greg points out that you have an extra "l" in your email address.

Thanks Greg!

Tom

Hi Eric,

Thanks for checking in. We have used the same email address and I do not think we have received any "bounce back" emails. However -- we use a lower case "l": lwi55@roadrunner.com.

Hope this works for you.
Tom

Subject: HTC Area 7 Gamma Survey

Hi Tom:

I just realized that I am receiving error messages for Walter's daughter email address: Lwii55@roadrunner.com. I am not sure if you have another contact email address or not. If so, please provide. I am going to the site in person soon and will bring a copy of the document to Walter. I will also ask him about the email address issue.

Thanks

Subject: HTC Area 7 Gamma Survey
Importance: High

Good Afternoon:

Attached is a brief summary for the gamma survey performed at 5382 Roberts Street in May 2017.

EPA did not find any elevated levels on the outside property with the exception of the driveway area. (Not the driveway proper but some areas towards the property front lawn as well as the area between the driveways of 5380 and 5382 Roberts Street). EPA also detected elevated levels within the garage. Specifically, below the concrete slab. That is described in this summary. We assume the garage slab and the previous driveway were constructed at the same time and slag was placed below as foundation prior to concrete pour. Since the existing driveway was excavated and replaced, there are no elevated readings detected. There were no elevated gamma levels detected within the interior of the home. Radon canister results were provided to the group previously.

Please let me know if you have any questions. Thanks
